## **CC&M Deploys Advanced Managed Browser Security to Protect Clients from Human Error and Online Threats**

*Leading MTSP Introduces Revolutionary Web Protection That Keeps Organizations Secure, Productive, and Free from Digital Risk*

GREENWOOD & GREENVILLE SOUTH CAROLINA – July 28, 2025 - CC&M, a leading managed technology services provider (MTSP), announced today the rollout of a cutting-edge browser security solution designed to dramatically reduce cybersecurity risks with its advanced managed browser security. With “human error” still being the #1 cause of data breaches in small to mid-sized businesses, organizations are looking for ways to reduce this liability by preventing employee mistakes from occurring in the first place with web-safe tools and CC&M’s latest advancement is helping to accomplish just that.

CC&M’s “safe browsing” experience gives organizations the ability to proactively block malicious content, phishing sites, and harmful web destinations before they ever reach employees, making it a powerful, preventative first line of defense. Strict filtering enables employees to freely utilize the power of the internet, artificial intelligence (AI) and key software without incurring unnecessary organizational risk. While many organizations’ first line of defense is complete reliance on everyone’s constant vigilance, CC&M’s safe browser complements

that awareness with a tool that scales and operates autonomously.

“The web browser is the most used and most vulnerable tool in any organization,” said Rocky Dunkman, Owner/CEO at CC&M. “While phishing emails are sometimes easier to detect, this technology allows us to protect our clients from the vast majority of web-based threats without relying on every individual employee to make the right call every single time.”

Domain Name System (DNS) filters out dangerous websites, downloads, and suspicious content. It quietly works behind the scenes, preventing access to risky destinations while allowing safe, approved content to load without interruption, so team members can research, collaborate and grow without risking organizational credentials.

While “safe browsing” is one of the main features of this technology, there are several other aspects of CC&M’s broader push to enable proactive, preventative cybersecurity within small to mid-sized organizations.

- **Web Threat Prevention:** Automatically blocks access to malicious or inappropriate websites, phishing scams, and domains associated with malware or ransomware.
- **Human Error Protection:** Removes the guesswork

from employee decision-making by filtering threats before they appear in the browser.

- **Password Management & Credential Safety:** Ensures company logins are securely stored and managed, reducing the risk of password reuse or accidental credential exposure. The password manager eliminates password reuse across apps and keeps credentials secure even on shared devices.
- **Distraction Reduction & Productivity Boost:** Helps organizations control which websites are accessible, limiting access to non-work-related content that impacts focus.

As organizations grow increasingly dependent on cloud-based platforms and web apps, secure browser environments are no longer optional—they’re essential. From protecting sensitive data to reducing the likelihood of ransomware attacks, this technology acts as an invisible but essential layer of armor around the modern workplace.

“You can’t rely on employee training alone to prevent every mistake,” added Dunkman. “While education is also necessary, we’ve seen that the most effective security

should be automatic, non-invasive, and effective. That's what we're offering our clients now—a tool that protects their business without slowing them down.”

#### **ABOUT Computer Consultants & Merchants Inc (CC&M)**

In 1992, Computer Consultants & Merchants was founded to bring technology services and equipment to businesses in the Orlando, Florida area. In 2001 they expanded their

footprint by adding offices in Greenwood and later Greenville covering the Upstate of South Carolina. CC&M streamlined the way companies do business, and the Company became successful for its expertise and service. Providing consulting, business acumen, and of course maintenance services that have always included parts and labor for clients.

Computer Consultants has evolved to meet the changing needs of businesses, providing clients with

exemplary technology consultation, Business phone Systems, Access Control with Video surveillance, Cyber Security, Managed Print, integration and Managed services are still the core of everything we provide.

Thirty years later CC&M is still doing what it does best, providing its clients with advanced technology solutions and stellar service!
